

SEVEN MEDICARE ADVANTAGE BENEFITS AMERICANS LOVE

Medicare Advantage offers a wide range of benefits from wellness programs to dental care. Every additional benefit plays a crucial role in helping Americans lead healthier and happier lives. In a survey conducted by Morning Consult on behalf of the Coalition for Medicare Choices, we asked more than 2,000 Americans 65+ on Medicare about their benefits and here's what we found:

Americans 65+ on Medicare Advantage are extremely happy with preventive services. **In fact, 91% of seniors reported being satisfied and 62% were very satisfied.** These services include screenings, vaccines, and testing that enable Medicare Advantage beneficiaries to detect health conditions early and treat them before they become larger issues.

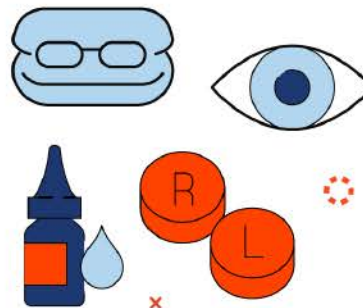

Prescription drugs can be costly, especially for Americans who are 65+ and have a limited budget. **88% of Medicare Advantage beneficiaries said they're satisfied with this benefit and 54% reported they were very satisfied.**

Wellness programs help Medicare Advantage beneficiaries access home care resources and groceries to encourage them to lead a healthy lifestyle. For 70% of participants, wellness programs are an important part of their coverage.

Unlike traditional Medicare, Medicare Advantage caps out-of-pocket costs. This helps beneficiaries who make less than \$30,000 a year access stable health care services, and has **74% satisfaction among Medicare Advantage beneficiaries.**

Most Medicare Advantage plans offer comprehensive vision care so beneficiaries can get glasses and eye exams. **Nearly 70% of Medicare Advantage beneficiaries are satisfied with their vision and eye care benefits.**

Medicare Advantage plans provide coverage for hearing aids and hearing exams as well as dental care including annual cleanings. **Over 40% of beneficiaries are satisfied with their hearing benefits, and nearly half are satisfied with their dental care.**

More than 24 million Americans depend on Medicare Advantage for reliable and affordable health care. Our findings show the program is giving beneficiaries the coverage benefits that they want and need.
