

SEVEN MEDICARE ADVANTAGE BENEFITS AMERICANS LOVE

Medicare Advantage offers a wide range of benefits from wellness programs to dental care. Every additional benefit plays a crucial role in helping Americans lead healthier and happier lives. In a survey conducted by Morning Consult on behalf of the Coalition for Medicare Choices, we asked more than 2,000 Americans 65+ on Medicare about their benefits and here's what we found:

Americans 65+ on Medicare Advantage are extremely happy with preventive services. **In fact, 93% of seniors reported being satisfied and 68% were very satisfied.** These services include screenings, vaccines, and testing that enable Medicare Advantage members to detect health conditions early and treat them before they become larger issues.

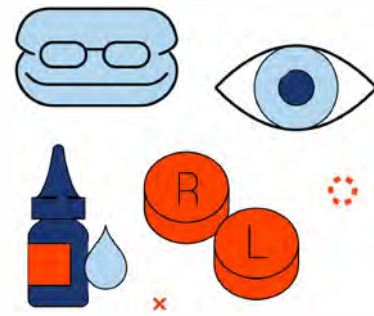

Prescription drugs can be costly, especially for Americans who are 65+ and have a limited budget. **92% of Medicare Advantage members said they're satisfied with this benefit and 62% reported they were very satisfied.**

Wellness programs help Medicare Advantage members access home care resources and groceries to encourage them to lead a healthy lifestyle.

More than 70% of Medicare Advantage members report being satisfied with their wellness benefits.

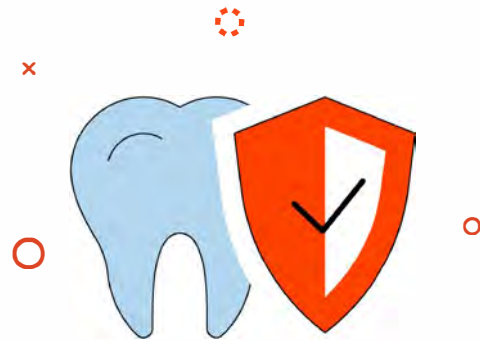

Unlike traditional Medicare, Medicare Advantage caps out-of-pocket costs. This helps Americans 65+ who have a limited budget access stable health care services, and has **81% satisfaction among Medicare Advantage members.**

Most Medicare Advantage plans offer comprehensive vision care so beneficiaries can get glasses and eye exams. **Nearly 75% of Medicare Advantage members are satisfied with their vision and eye care benefits.**

Medicare Advantage plans provide coverage for hearing aids and hearing exams as well as dental care including annual cleanings. **Nearly half of Medicare Advantage members are satisfied with their hearing benefits, and 60% are satisfied with their dental care.**

Over 26 million Americans depend on Medicare Advantage for stable and affordable health care. Our findings show the program is giving Americans 65+ the coverage benefits that they want and need.
